Athletics New Zealand COVID-19 Public Health Measures at Level 2

Athletics NZ recommend the following public health measures for clubs to follow at Alert Level 2

Public Health Measure	Details
Cleaning and Hygiene	 Everyone must adhere to basic hygiene measures, including washing and drying hands before and after any activity, and before and after using any shared equipment. Facilities like clubrooms, equipment sheds, and gyms must have a written plan for safe operation in place that includes details about equipment sanitation and handwashing protocols. Minimise use of shared equipment. Shared training equipment, such as hurdles, throwing implements or cones etc., should be cleaned and dried before and after training sessions or races. Gym users should wipe down and clean equipment between each use. Athletes should bring their own personal equipment, such as towels and water bottles. Facilities, water, soap, and towels/drier should be made available for participants to wash and dry their hands, otherwise hand sanitizer should be provided (containing at least 60% alcohol). Stay home if you're sick and do not take part in any sport or recreation if you have flu-like symptoms, self-isolate at home and get tested immediately. Regularly communicate this message to your members. People with existing and underlying medical conditions should stay home. Cough into elbow, avoid touching your face. Avoid spitting. Ensure your facilities have signage and information regarding precautions for managing COVID-19.
Physical Distancing	 Physical distancing is not required during a field of play, which includes training sessions, events, and races. However, 1 metre physical distancing should be maintained before and after training sessions and events. In these instances, contact tracing must be undertaken. People are encouraged to remain 2 metres apart from people they do not know or where there is no contact tracing in place. Training and Event Tips: Ensure someone in the group is assigned to the responsibility of undertaking contact tracing – this includes reminding people to scan the QR codes at all group training sessions and group runs, however informal they may be. Choose a venue that will allow plenty of space between athletes.

	• If you are using a public venue, can you book the venue for your club's sole use? Otherwise, consider an early start time
	where other members of the public are less likely to be there.
	• Refer to the Athletics NZ Planning for Summer Athletics at Covid Level 2 guidelines for further tips on athletics at Level 2.
Contact Tracing	• It is mandatory for clubs and training facilities to set up a NZ Covid Tracer app QR Code, and have an alternative method if
	sign in.
	The register should be kept for at least 1 month and be easily accessible.
	 Assign a volunteer to remind people to sign in when they visit your club / facility.
Gatherings	Gatherings for Community Sport are limited to groups of 100 in a defined space.
	The 100-person limit includes athletes, spectators, coaches and officials.
	• A sports field or venue can have multiple defined spaces, providing you have the resources to keep groups separate – either
	through consistent 2metre physical distancing, or with barriers.
	If in doubt, cancel or postpone your event.

Please note, this advisory is current as of 15 February 2021 and is subject to change.
